about

Front-end web developer passionate about the intersection of technology and design. Interested in building consumer software and user experiences that make life easier. Self-taught web development and UI/UX design. Ready to learn new skills and technologies.

experience

2hats   2018–present

Junior Front-End Web Developer   Sydney

- Co-developed new React web portal in a month before launch. Grew user base by 40%.

- Assisted in migration to React Hooks from Redux just as it was first released. Reduced amount of code written by 30% and halved JS package size.

- Developed a minimal, clean design language for the company's web portals.

- Learnt about and built on top of the cloud architecture with Cloud Firestore, Cloud Functions and CI/CD with Bitbucket Pipelines on the job with no prior experience.

- Promoted the company at university events, actively driving sign ups and engagement. Currently developing an online course on React and web development practices.

skills

- **Front-end web development.** React + Hooks, responsive CSS + SCSS, ES6+, Webpack. Integrating npm modules, semantic HTML, browser compatibility, web performance.

- **Implementing UI/UX designs.** Strong attention to detail and typography. Pixel-perfect recreations of designs. Adobe Photoshop, Illustrator, XD, Sketch.

- **Team-based development and collaboration.** Git. Strong communication skills.

- **Familiar with back-end web development.** Cloud Firestore + Functions, Node.js. CI/CD with Bitbucket Pipelines, Netlify. Also familiar with Python, Bash shell.

education

Bachelor of Advanced Computing   2018–22

The University of Sydney

- Awarded prestigious **Sydney Scholars Award** for outstanding academic achievement.
- Accepted into the elite **Dalyell Scholars** programme for high-achieving students.
- Major in Software Development, minor in Computer Science.
